

ROLE DESCRIPTION

Document No.: AROH-HR-JD-001

Date: 06 July 2026

Role Description

Ecosystem Operations Coordinator (Operator)

This document forms an integral part of the **Offer of Appointment** issued by **AROH Open Source** and outlines the responsibilities, expectations, authority, and operational scope of the **Ecosystem Operations Coordinator (Operator)** role.

1. Position Information

Position Title: Ecosystem Operations Coordinator (Operator)

Department: Operations

Project: AROH Open Source

Reports To: Founder & Administrator

Effective From: 06 July 2026

2. Purpose of the Role

The Ecosystem Operations Coordinator (Operator) plays an important role in supporting the day-to-day operational activities of the AROH ecosystem. The primary objective of this position is to ensure that approved operational initiatives are executed efficiently while maintaining the professional standards, values, and vision established by AROH.

The Operator serves as the operational representative of the project and works closely with the Founder & Administrator to coordinate activities that contribute to the growth, stability, and overall success of the ecosystem. This role is focused on execution, coordination, communication, and community support rather than software development or technical administration.

3. Primary Responsibilities

As the Ecosystem Operations Coordinator, you are expected to assist in the planning, coordination, and execution of operational activities across the AROH ecosystem. Your responsibilities include managing approved community initiatives, organizing and overseeing project events, generating and distributing redeem codes for promotional or community activities, publishing announcements and project updates through authorized communication channels, and maintaining accurate operational records where applicable.

You are also expected to monitor community feedback, identify operational issues requiring attention, and communicate relevant information to the Founder & Administrator in a timely manner. From time to time, you may be assigned additional operational responsibilities that support the objectives of the project.

4. Authority and Scope

The authority granted under this position is limited to operational activities specifically approved by the Founder & Administrator. Within this scope, you may coordinate events, manage operational content, publish approved announcements, communicate with community members regarding authorized activities, and perform other operational tasks assigned to you.

This appointment does not grant authority to modify application source code, alter project architecture, access confidential administrative credentials, change security configurations, approve software releases, make financial commitments, enter into legal agreements, or represent AROH in legal or contractual matters. All strategic, technical, architectural, and administrative decisions remain under the authority of the Founder & Administrator.

5. Professional Expectations

While serving in this role, you are expected to demonstrate professionalism, integrity, accountability, and respect in all interactions related to the project. You should perform assigned responsibilities diligently, maintain effective communication, safeguard confidential information, and contribute positively to the collaborative environment of AROH.

As a representative of the project, your conduct should reflect the values of openness, responsibility, collaboration, and continuous improvement.

6. Confidentiality

During the course of your contribution, you may gain access to internal project information, development plans, operational procedures, documentation, community management strategies, or other information that has not been publicly released. Such information shall be treated as confidential and must not be disclosed to any third party without prior authorization from the Founder & Administrator.

This obligation remains applicable throughout your association with the project and continues after your role has concluded.

7. Performance and Review

The responsibilities associated with this position may evolve as the AROH ecosystem continues to grow. Your performance will be reviewed periodically based on the quality of operational execution, reliability, communication, professionalism, and overall contribution to the project.

Constructive feedback and recommendations for improvement are encouraged as part of the collaborative nature of the AROH Open Source project.

8. Modification of Responsibilities

AROH Open Source reserves the right to modify, expand, or revise the responsibilities associated with this role to accommodate future project requirements, operational improvements, or organizational growth. Any significant changes will be communicated appropriately.

9. Acknowledgement

This Role Description should be read in conjunction with the accompanying Offer of Appointment. By accepting the appointment, the appointed contributor acknowledges that they have read and understood the responsibilities, expectations, and scope of the Ecosystem Operations Coordinator (Operator) role and agree to perform these responsibilities to the best of their abilities.
